

# Style A — Complete templates and assets for SK Santisima Cruz IMS

This canvas contains a complete set of files you can copy into your Flask project. Files included below:

- `templates/base.html`
- `templates/dashboard_base.html`
- `templates/index.html`
- `templates/login.html`
- `static/style.css` (Style A — orange neumorphism)
- `static/script.js` (handles sidebar toggle, persistence, carousel controls and basic charts wiring)

  if(dir === 'next') cur = cur >= total ? 1 : cur+1;
  else cur = cur <= 1 ? total : cur-1;
  info.textContent = cur + ' / ' + total;
});

})();

// Optional: small carousel initializer – but we left full carousel code within
index where needed

```

## Instructions & notes

- Paste each template into `templates/` and CSS/JS into `static/`.
- This style keeps all previous routes and server-side logic unchanged.
- Sidebar persistence uses `localStorage` (option `sk_sidebar_collapsed`).
- The mobile sidebar toggles using the topbar hamburger — on **desktop** the hamburger toggles mini collapsed state.
- I intentionally **do not auto-close** the sidebar when clicking elsewhere because you asked the sidebar not to vanish when clicking other parts.
- On `index.html` the sidebar is hidden and the hamburger button is also hidden (per your request). When you navigate to dashboard pages, the sidebar and hamburger appear again.

If you want I can also:

- Add Chart.js example dataset usage inside `dashboard_base.html` to render the three charts with `PROJECT_DATA`, `LOGBOOK_DATA`, and `REPORT_DATA`.
- Add pagination logic for charts (server-driven or client-driven slices).
- Provide a small Git-style patch you can apply.

Tell me which of the three (charts, pagination, patch) you'd like next and I will update the canvas file.
